

## Growing Vegetables Allows Home Gardeners to Continue Fall Gardens as Weather Cools

By Mike Darcy

As the calendar continues to progress through August and toward September, home gardeners know what is next for their gardens. The vibrantly colored plants, flowers and vegetables they've spent countless hours tending to will eventually begin to fade, leaving behind an empty garden and the hope that next year's group of plants will be even better. However, there are still options to prolong this year's growing season. Home gardeners in the

Pacific Northwest can cultivate beautiful, edible fall gardens filled with home-grown vegetables, with unmatched freshness and can do so almost immediately. **Read More »**

## Prevent Snails and Slugs from Laying Eggs in Fall to Minimize Hatching in New Gardens Next Spring

By Ed Hume

September and October is prime breeding season for slugs. During this time of year, slugs will lay clusters of eggs along the edge of the lawn, under sticks and stones, or even in high grass.

Baiting in the fall and using a product that's effective in all types of weather, such as Corry's® or Deadline®, helps ensure that you'll have fewer slugs and snails the following spring. **Read More »**

## Three Essential Tips for Bringing Plants Indoors this Fall

By Ed Hume

Bringing houseplants indoors in the fall is a great way to extend the life of your plant investment, allowing everyone to enjoy foliage throughout the year. African violets and hibiscus, for example, are ideal for such a move. Taking your plants indoors always seems easy enough; however, many gardeners face disappointment when their plants quickly deteriorate. Here are three critical factors for best results when making the transition: **Read More »**

## TIRED OF SLUGS AND SNAILS DESTROYING YOUR GARDEN?
